DISCLAIMER

This report has been prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in (Rabat, Morocco) for U.S. exporters of domestic food and agricultural products. While every possible care has been taken in the preparation of this report, information provided might no longer be complete nor precise as some import requirements are subject to frequent change. It is highly recommended that U.S. exporters ensure that all necessary customs clearance requirements have been verified with local authorities through your foreign importer before sale conditions are finalized.

FINAL IMPORT APPROVAL OF ANY PRODUCT IS ALWAYS SUBJECT TO THE RULES AND REGULATIONS AS INTERPRETED BY THE COUNTRY OF IMPORT AT THE TIME OF PRODUCT ENTRY.

Please contact this office, if you have any comments, corrections or suggestions about the material contained in this report. Our e-Mail address is agrabat@usda.gov

EXECUTIVE SUMMARY

This report provides the list of certificates required by the government inspectors in charge of controlling food and agricultural imports into Morocco. Samples of newly agreed upon certificates between the Ministry of Agriculture and USDA are also provided for products of particular interest to United States.

At the points of entry, the sanitary control and the conformity with the local regulation for food and agricultural products is carried out primarily by Ministry of Agriculture inspectors. In major ports (Casablanca, Agadir, and Tanger), the importer deals with one Ministry of Agriculture office, the DCQ (Direction de Controle de la Qualité) and the dispatch of the importation documents is done internally depending of the type of product (animal, plant, raw, or processed).

Typically, the clearing process by DCQ inspectors consists of up to three major steps based on the familiarity with commodity, importer's experience, and origin:

- a) The inspector clears the commodity by merely checking the documents provided.
- b) The inspector might require physical inspection of the imported commodity before clearance.
- c) The inspector might require that samples of the imported goods be drawn and sent to local GOM approved laboratory for analysis.

DCQ inspectors issue a certificate that authorizes the importer to clear customs. Customs officers will not authorize the goods into the country without a certificate issued at the point of entry by the DCQ inspectors.

In order to help DCQ inspector make a quick decision and not request laboratory analysis and especially for the newly imported products, the exporter should provide extensive documentation (description of the products, lab analysis result, certification of approval by the government of the exporting country, etc.). Some importers send samples of newly imported products to the DCQ office before they ship the products to get a feel of what would be required to swiftly clear customs.

Normally, it takes less than a week to clear products through customs. If a sample of food is taken for laboratory analysis, the customs clearance may be delayed up to 8 days.

In addition, the certificates that are typically required by customs office are:

- Bill of lading
- Original invoice
- Packing List
- Certificate issued by the Ministry of Agriculture DCQ that the commodity has been inspected and passed the sanitary control.
- Certificate of Origin. Although under the upcoming FTA with the US the certificate of origin will not be requested and the origin will be determined by the importer's declaration and accompanying documents (invoice, bill of lading, etc..)

I. Certificates Required When Exporting food and Agricultural Products to Morocco

Product(s)	Title of Certificate	Attestation Required on the Certificate	Purpose	Requesting Ministry
Non Animal Origin Processed Food Products	"Certificate of Conformity" or "Certificate of Lab Analysis"	Chemical and Physical Laboratory Analysis Results of the Product. Product is suitable for food use.	Products content conforms to what is on the label. Especially useful for the first shipments. Detailed analysis is likely to prevent requirement by inspectors of local laboratory testing.	Ministry of Agriculture, Fraud Repression Division
Processed Food Products Containing some animal origin products (except beef)	Certificate of free sale (Wholesomeness) issued at State level where the product was manufactured	See model certificate # 1 developed by USDA and Ministry of Agriculture	Manufacturer is inspected periodically and is in substantial compliance with current good manufacturing practices and relevant FDA requirements	Ministry of Agriculture Livestock Division
Food for Special use (Health food, diet food, food supplements, etc..)	"Certificate of Conformity or Certificate of Lab Analysis"	Chemical and Physical Laboratory Analysis Results of the Product.	Products content is conform to what is on the label. Especially useful for the first shipments. Detailed analysis is likely to prevent requirement by inspectors of local laboratory testing.	Ministry of Agriculture Fraud Repression Office
	Registration Certificate delivered by the Moroccan Ministry of Health	Evidence that the product has been approved and registered before the Moroccan Ministry of Health.		Customs Office
Plants and Part of Plants	Phytosanitary Certificate according to the IPPC model	See standardized IPPC phytosanitary certificate model	Certify the plants or parts of the plants are free of quarantine pests. The phytosanitary certificate must be issued no more than 14 days before the actual shipping.	Ministry of Agriculture, Plant Protection Division

Apple	Standard APHIS Phytosanitary Certificate with an Additional Declaration	<p>Standard APHIS Certification: "This is to certify that the plants, plant product or other regulated articles described herein have been inspected and/or tested according to appropriate official procedures and are considered to be free from the quarantine pests, specified by the importing contracting party and to conform with the current phytosanitary requirements of the importing contracting party including those for regulated-non quarantine pests."</p> <p>The certificate must also include the following additional Declaration: <i>"The fruit was grown in a production area of the USA in which, on the basis of the official annual surveys, the Apple Maggot does not occur"</i></p>	As agreed upon between the Ministry of Agriculture and APHIS/PPQ on March 2006.
Tomatoes and Eggplants Seeds		<p>APHIS Phytosanitary Certificate must include the following Additional Declaration :</p> <p><i>"The seed are free from..... clavibacter michiganense pv. Michiganense and Ralstonia solanacearum."</i></p>	
Dairy Products	<p>2 Certificates Required:</p> <ol style="list-style-type: none"> 1) Sanitary Certificate issued by AMS/USDA 2) APHIS 	<p>AMS Certificate: See model #3 in Appendix</p> <p>APHIS Certificate– Standard VS Form 15-4 with no additional declarations</p>	<p>To avoid any complications at the Moroccan ports, please ensure that the date of the certificate issued by AMS is prior to the date of shipment. The date on APHIS certificate can be subsequent to the date of shipment.</p> <p>Ministry of Agriculture Livestock Division</p>

Product(s)	Title of Certificate	Attestation Required on the Certificate	Purpose	Requesting Ministry
Beef	<p>FSIS Meat and Poultry Export Certificate of Wholesomeness as agreed upon with Moroccan Authorities</p> <p>Certificate of Physical, chemical And microbiological analysis</p> <p>Halal Certificate.</p> <p>For meat meant to enter Morocco as part of the TRQ for Hotel and Restaurant, evidence of the USDA "Choice" grade</p>	<p>Being finalized by the FSIS and Ministry of Agriculture</p> <p>Show Conformity of contents and microbiological status with Moroccan standards</p> <p>Meat slaughtered According to the Islam Ritual.</p> <p>Issued by AMS. Being finalized with the Ministry of Agriculture</p>	<p>Products content is conform to what is on the label. Especially useful for the first shipments. Detailed analysis is likely to prevent requirement by inspectors of local laboratory testing.</p> <p>To qualify as "Hilton Meat" and be part of TRQ (Tariff Rate Quota) that enters Morocco at preferential rates.</p>	<p>Ministry of Agriculture, Livestock Division.</p> <p>Ministry of Agriculture</p> <p>Ministry of Agriculture</p> <p>Customs Office</p>
Poultry Meat	<p>FSIS Meat and Poultry Export Certificate of Wholesomeness as agreed upon with Moroccan Authorities</p> <p>Halal Certificate</p> <p>Result of Microbiological Laboratory Analysis</p>	<p>Being finalized by the FSIS and Ministry of Agriculture</p> <p>Poultry Slaughtered according to Islam Ritual</p> <p>Show Conformity with Moroccan Microbiological standards.</p>		<p>Ministry of Agriculture Livestock Division</p>
Live Cattle	<p>Model Health Certificate agreed upon by APHIS and MinAg.</p> <p>Sanitary Certificate at the Port of Loading issued at most 24 hours before export.</p> <p>Results of Laboratory Analysis for tests required in the Model Health Certificate.</p>	<p>See Model at: http://www.aphis.usda.gov/vs/ncie/iregs/animals/mo_bo_br.pdf (Needs to be updated following the BSE cases in the United States)</p>		<p>Ministry of Agriculture Livestock Division</p>

Product(s)	Title of Certificate	Attestation Required on the Certificate	Purpose	Requesting Ministry
Cattle Semen	Model Health Certificate agreed upon by APHIS and MinAg Results of Lab tests required	See Model at: http://www.aphis.usda.gov/vs/ncie/iregs/animals/mo_bo_se.pdf	Results of Laboratory Analysis for the tests required in the Health Certificate.	Ministry of Agriculture Livestock Division
Milk Replacers / Calf Milk	Sanitary Certificate For Import Of Calf Milk And Milk Replacers	See Model Certificate # 2. Must includes: Special Requests: Addition of a chemical tracer is required (need to be specified) Contain no fat from animal origin (except those of butyrique origin) Contains no harmful residues in quantities exceeding the maximum accepted for human health. Do not contain radioactive elements	The tracer should allow the Ministry of Agriculture to confirm if the milk replacer has been used other than for animal feeding.	Ministry of Agriculture Livestock Division
Animal Products used for feed and by-products industry imported from countries that are not free of contagious diseases		Certificate that the product has been treated according to Moroccan requirement.		Ministry of Agriculture Livestock Division
Honey and bee products	Sanitary Veterinary Certificate Radiation Certificate	See Model Certificate # 4 Attached		Ministry of Agriculture Livestock Division
Hides and Skins	Sanitary Veterinary Certificate	See Model Certificate # 5 Attached		Ministry of Agriculture Livestock Division

II. Government Certificate Legal Entry Requirements

The Ministry of Agriculture will accept only certificates issued by government officials. Certificates issued by federal agencies as well as by state government agencies are normally accepted and even if not explicitly required could help greatly the acceptance of the products. In most cases, certification issued by the exporting companies or by entities that are not accredited and duly authorized by the U.S. government (such as private labs) are not sufficient evidence to clear sanitary inspection.

Issuance Date/Duration of the certificates: There is a regulation that explicitly requires that phytosanitary certificates (for fresh fruits and vegetable and live plant materials) be issued at most 14 days before loading. For other products, to our knowledge, there is no regulation that specifies the duration of validity of the sanitary certificate. However, for some commodities (such as dairy cattle, cattle semen) and because of the laboratory tests required, the results might be valid only for a certain period before the tests have to be redone. Specifically for dairy products, the Moroccan authorities continue to require that the date on the AMS certificate must be prior to the date of shipment of the product.

The Ministry of Agriculture expects the certificate to be issued before the date of shipment. In some particular cases however, the Ministry of Agriculture, meaning adequate explanation of the control system in the United States, could accept certificates that are issued after the loading time.

Original of the certificates are needed by electronic and fax copies might be accepted to swiftly clear customs but the importer remains responsible for providing the original of the certificate.

Each shipment must have a separate sanitary certificate.

For goods transiting through Europe, a sanitary certificate issued by the U.S. authorities is required. If, originally the good was not specifically meant to be exported to Morocco, the sanitary certificate issued by USDA to the European Authorities can be accepted but an additional certificate certifying that the commodity has been properly handled and stored while in Europe might be necessary.

APPENDIX I: Model Of Sanitary Certificates Required To accompany Food And Agricultural Products Exported into Morocco

**Model Certificate # 1: Processed Food Containing Some Animal Origin Products
